EDUCATION

- **Jain (Deemed-to-be University)** *2021 – 2025*
  B.Tech – Computer Science & Engineering (AIML) | ***CGPA: 8.10/10*** Bengaluru, Karnataka

EXPERIENCE

- **Navikenz Ltd.** *March 2025 – Present*
  Software Engineer | Promoted from Intern (Oct 2025) Hybrid, Noida
  - Earned **Databricks Certified Data Engineer Associate** through structured training in **Apache Spark**, **PySpark**, **Delta Lake**, and **Lakehouse Architecture**; applied skills directly to production ETL workflows.
  - Designed and delivered a **Data Ingestion Framework POC** on **Databricks + Delta Lake**, automating **ETL pipelines** across multiple data sources and standardizing ingestion workflows for high-performance internal analytics.
  - Conducted end-to-end **QA testing** for a client-facing **Agentic AI** data ingestion pipeline, validating transformation logic, data accuracy, and system reliability across the full ingestion lifecycle under production conditions.
  - Developed a **Data Deduplication Detection POC** applying ML-based similarity and hashing techniques to identify and eliminate redundant records at scale; validated approach on internal R&D datasets.
  - Led **Navisphere POC** – migrated **Databricks** analytics workloads to a **React**-based self-serve web interface, reducing analyst dependency for ad-hoc **data warehousing** queries by non-technical stakeholders.

PROJECTS

- **NaviMed Scheduler - Smart Patient Appointment System**
  Tech: Python • FastAPI • PPO (Stable-Baselines3) • Next.js • Tailwind CSS • SQLite • ARIMA
  - Built an RL-based clinic scheduler with a **PPO** agent trained for **500k timesteps** in a simulated 3-doctor, 32-slot/day environment with emergencies, priority tiers, and no-show risk; achieved **100% scheduling success** (37.35 avg reward), roughly **4**× the untrained baseline.
  - Engineered **FastAPI** microservices for RL inference, no-show risk scoring on a **110k-appointment dataset**, and **ARIMA**-based demand forecasting; served results via a **Next.js/Tailwind** admin dashboard with real-time analytics.
  - Integrated an **LLM** chatbot for booking, rescheduling, and automated patient notifications.
- **SignaText - Sign Language to Text using Gesture Detection**
  Tech: Python • TensorFlow • Keras • OpenCV • MediaPipe • CNN • NLP
  - Led a team building a real-time **ASL**-to-text system; trained a **27-class CNN** (843K parameters) for fingerspelling recognition using **OpenCV**, **TensorFlow/Keras**, and **MediaPipe**.
  - Designed a two-stage recognition pipeline (main CNN plus letter-group classifiers for similar pairs) with a **50-frame stability gate**, running real-time inference at **30+ FPS** on CPU.
  - Applied **NLP** post-processing to assemble recognized letters into coherent words and sentences.

ACHIEVEMENTS

- **Finalist** – Lumen Hackathon; shortlisted for interview and received an internship offer.
- **2nd Place** – Formidium Hackathon, Blockchain & AI Category.
- **2nd Place** – Honeywell International Hackathon.
- **Published** – *Faster Multi-Document Summarization* using Primera & Pegasus NLP models (Python).

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, TypeScript, HTML/CSS
- **Frameworks:** React, FastAPI, TensorFlow, Keras, OpenCV, Matplotlib
- **Data Engineering:** Databricks, Apache Spark, PySpark, Delta Lake, Azure Data Factory, Microsoft Fabric
- **Concepts & Architecture:** ETL/ELT Pipelines, Lakehouse Architecture, Data Warehousing, Agentic AI
- **Databases:** SQLite, Neo4j, MySQL
- **Cloud & DevOps:** Microsoft Azure, Google Cloud Platform (GCP), Docker, Terraform, GitHub

CERTIFICATIONS

- Databricks Certified Data Engineer Associate – **Databricks**
- Azure AI Engineer Associate – **Microsoft**
- Azure AI Fundamentals – **Microsoft**
- Introduction to Generative AI – **Google Cloud**

EXTRACURRICULAR

- Active member of **Prayas** (NGO supporting underprivileged education & healthcare) and **Go Nirvana Foundation** (animal welfare services).
